

RANEEM MOHSEN

Full Stack Developer | MERN Stack | React.js | Node.js

Egypt | +201227782757 | ranemmohsen05@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full Stack Developer specializing in building seamless, end-to-end web applications. I develop responsive front ends with HTML, CSS, and frameworks like React, and manage back-end logic using Node.js with Express.js and Django. I work confidently with SQL (PostgreSQL, MySQL) and NoSQL (MongoDB) databases, connecting front and back ends through REST and GraphQL APIs to deliver reliable, production-ready features across the full stack.

EXPERIENCE

Full Stack Developer Intern (MERN) - Digilans

Jan 31, 2026 – Jun 2026

- Worked as part of a full stack team using the MERN stack (MongoDB, Express.js, React, Node.js) to build and maintain web application features.
- Built and consumed REST APIs, and contributed to both frontend (React) and backend (Node.js/Express) components.
- Gained hands-on experience with database design and integration using MongoDB and Mongoose.
- Collaborated with the development team on version control workflows (Git/GitHub) and code reviews.

Intern – CIB Bank

Nov 2023

Remote

- Provided foundational knowledge in banking principles, practices, and regulations.
- Enhanced employability in the finance sector.
- Recognized by employers as a mark of professionalism.

Intern – Bank Misr

Nov – Dec 2021

Remote

- Offered a wide range of banking services, including personal banking (savings accounts, loans, credit cards) and corporate banking (financing, investment services).

PROJECTS

Military Academy Digitization Platform | Web Application

Jun 18, 2026

- Built a web platform for the Egyptian Military Academy to replace fully paper-based administrative processes with a digital system.
- Implemented modules for permits, leave requests, petitions/complaints, payments, relatives' data records, medical records, and violations and disciplinary actions.
- Designed the system to be reusable by any organization or institution still relying on paper-based workflows, not limited to the military sector.

Fitplan App | Mobile Application

Jan – Jul 2024

- Focused on building an app that crafts customized diet plans for people looking to reach a healthy weight while managing health issues like high blood pressure, diabetes, and low blood pressure.
- The app offers meal suggestions and enables users to find nearby labs, check out their reviews and ratings, and choose a preferred lab.
- Integrated OpenAI to enhance personalization and improve overall user experience.

EDUCATION

B.A. in Computer Science | SADAT Academy for Management Sciences

Sep 2020 – Jul 2024
GPA: 3.32 | Cairo, Egypt | Graduation Project: Grade A

CERTIFICATIONS

- [Front-End Development – Route \(Mar 2025\)](#)
- [Front-End Development – Coursera \(Jun 1, 2026\)](#)

- [Software Fundamentals: C++, Algorithms & Data Structures Introduction, Java – Route](#)
- [CIB Bank Internship Certificate \(Nov 2023\)](#)
- [CCNA – Telecom Egypt \(Oct 2022\)](#)
- [Bank Misr Internship Certificate \(Nov 2021\)](#)

ORGANIZATIONS

Community Service Volunteer | Resala Charity Organization

Jan – Dec 2025

- Coordinated large-scale charity events and distribution convoys, partnering with community groups to increase reach and ensure timely delivery of aid.
- Recruited, mentored, and motivated volunteer teams through targeted team-building and clear communication, improving engagement and operational reliability.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++, Java

Frontend: React (Hooks, Context API), Next.js (SSR/SSG), Redux Toolkit, Tailwind CSS, Zustand

Backend: Node.js (Async/Await, Event Loop), Express.js (REST APIs, Middleware), Django, REST & GraphQL APIs

Databases: MongoDB & Mongoose (Schema Design, Aggregation, CRUD), PostgreSQL, MySQL

Security: JWT / Bcrypt Security

Computer Science Fundamentals: Data Structures & Algorithms (C++, Java)

Deployment: Vercel, Render, AWS Deployment

Version Control & API Tools: Git / GitHub, Postman (API Testing)
